PROJECTS

- InterviewMentor AI** | *React.js, Node.js, Express.js, MongoDB, Gemini API* | [Live Demo ↗](#) Mar 2026 - May 2026
- Built an AI-powered full-stack platform that parses resumes and job descriptions to generate personalized interview prep reports, cutting manual prep time significantly.
 - Engineered a skill-gap analysis engine using Google Gemini API that computes match scores between candidate profiles and target roles, surfacing actionable insights.
 - Automated generation of role-specific interview questions and a 7-day structured study plan tailored to identified skill gaps.
 - Implemented JWT-secured REST APIs, MongoDB-backed report persistence, and a fully responsive React.js UI with Tailwind CSS for seamless cross-device experience.
- ChatBox** | *React.js, Node.js, Express.js, MongoDB, Socket.io* | [Live Demo ↗](#) Jan 2026 - Feb 2026
- Built a real-time full-stack chat application enabling instant one-to-one communication using Socket.IO and WebSockets.
 - Implemented JWT-based authentication and authorization for secure user login and protected routes.
 - Developed RESTful APIs with Express.js and MongoDB to manage users, conversations, and message history.
 - Designed a responsive React.js interface with real-time message updates, user profiles, and online user tracking.
- Car Rental System** | *React.js, Node.js, Express.js, MongoDB* | *Group Project* Apr 2025 - May 2025
- Collaborated in a team to build a full-stack car rental management system for vehicle booking and rental operations.
 - Led frontend development using React.js, building the vehicle listing, booking workflow, and user dashboard interfaces.
 - Implemented dynamic vehicle search and filtering with a responsive UI using Tailwind CSS.
 - Integrated frontend components with backend REST APIs for booking management and user authentication.
